

# Classroom Graph Paper Pack

Free printable graph paper templates for teachers, students, and homeschool families

Includes square grids, metric grids, coordinate planes, dot grid, isometric paper, hex grid, and polar graph paper.

**Made with Grid Paper Shop**

Create more custom paper for free at <https://gridpapershop.com>

# How to Use This Pack

This free classroom pack includes printable graph paper templates for math lessons, homework, notebooks, science plotting, design activities, and creative projects.

**Printing tip:** print at 100% scale or “Actual Size.” Avoid “Fit to page” if the exact spacing matters.

**License:** free for personal, classroom, and homeschool use. Please do not resell this PDF. If you share it online, link to <https://gridpapershop.com> so others can make their own custom graph paper.

Template	Best use
1/4 inch square grid	General math, notebooks, coordinate work
5mm square grid	Metric graphing and A4-style assignments
Coordinate planes	Algebra, functions, transformations
Dot grid	Notes, bullet journals, low-distraction layouts
Isometric grid	3D drawing and geometry
Hex grid	Maps, games, chemistry, tiling
Polar graph paper	Trig, polar coordinates, circular plots

# 1/4 Inch Graph Paper

Four squares per inch; a classroom standard for math and notebooks.

# 5mm Graph Paper

Metric square grid for science, math, and design.

# Large 1/2 Inch Graph Paper

Large squares for younger students, posters, and demonstrations.

# Full-Page Coordinate Plane

Printable coordinate planes for algebra, functions, transformations, and graphing practice.

# Four Coordinate Planes Per Page

Printable coordinate planes for algebra, functions, transformations, and graphing practice.

# Dot Grid Paper

Great for bullet journals, visual notes, and low-distraction graphing.

# Isometric Graph Paper

Use for 3D drawing, geometry sketches, and design practice.

# Hex Grid Paper

Useful for RPG maps, game design, chemistry sketches, and tiling patterns.

# Polar Graph Paper

For trigonometry, polar coordinates, waves, and circular graphing.
